CONTENTS

March

Papers

Influence on strength of compression panels of stiffener section, spacing and welded connection. M. R. Horne, P. Montague and R. Narayanan. Paper 7975 1
Flood estimation for small East African rural catchments. D. Fiddes. Paper 7979 1
Towards an optimal utilization of the water resources of the Nile Basin. F. Z. El-Shibini and J. R. Rydzewski. Paper 7987 1
Increasing sewer capacity by polymer dosing. R. H. J. Sellin. Paper 7971 . 1
The prediction of the shear lag effect in box girders. H. R. Evans and A. R. Taherian. Paper 7978 1
Buckling and vibration of thin, flat-walled structures continuous over several spans. Y. K. Cheung and C. Delcourt. Paper 7959 1
A contribution to the design of composite beams to satisfy deflexion criteria. R. Taylor and J. Frodin. Paper 7973 1
The structural behaviour of a prestressed box beam with thin webs under combined bending and shear. A. D. Edwards. Paper 7977 1
The elasto-plastic analysis of imperfect square plates under in-plane loading. J. E. Harding, R. E. Hobbs and B. G. Neal. Paper 7981 1
Non-linear finite element analysis of concrete slab structures. R. J. Cope and P. Vasudeva Rao. Paper 7988 1
Optimum design of composite box girder bridge structures. J. O. Surtees and D. Tordoff. Paper 8004 1

Technical notes

Thermal stresses in refractory lined steel cylinders. H. M. Haydl and A. N. Sherbourne. TN 144 1
Hydraulic jumps in trapezoidal and triangular channels. K. H. M. Ali and A. Ridgway. TN 153 2

Discussions

The application of vorticity concepts to three irrigation intake designs. K. J. W. Spurr and F. J. Boucherat. Paper 7796 2
Determination of maximum crack width in two-way reinforced concrete slabs. P. Desayi and A. B. Kulkarni. Paper 7913 2
The design and modelling of air-regulated siphon spillways. D. A. Ervine. Paper 7930 2
An empirical modification to linear wave theory. T. S. Hedges. TN 141 . 2

June

Papers

Thin plate weirs. W. R. White. Paper 8006 2
Design and testing of a light gauge steel folded plate roof. J. M. Davies, E. R. Bryan and R. M. Lawson. Paper 8008 2
Performance of storm drainage simulation models. P. J. Colyer. Paper 8011 . 2
The collapse strength of tubular steel scaffold assemblies. E. Lightfoot and G. Oliveto. Paper 8023 3
Hydrological studies on some river catchments in Greater London. K. Butters and A. Vairavamoorthy. Paper 8024 3
Application of programmable pocket calculators to moment distribution and the solution of simultaneous equations. F. W. Williams. Paper 8025 . . 3
The composite behaviour of elastic wall–beam systems. B. Stafford Smith and J. R. Riddington. Paper 7936 3

Experimental investigation of an orthotropic steel bridge deck. A. K. Azad and M. S. Troitsky. Paper 7958 393
Sediment balance method for irrigation canal design. K. V. H. Smith. Paper 7993 411
Wire mesh as shear reinforcement in concrete. K. K. Ghosh and M. Mukhopadhyay. Paper 8003 427
Optimim reinforcement of concrete slab elements. C. T. Morley and H. Gulvanessian. Paper 8019 441
Prestressed concrete beams with no stirrups in torsion, bending and shear. M. J. Cooper and L. H. Martin. Paper 8012 455

Technical notes

Concrete crack control in sea water platforms. J. R. Lloyd. TN 138 . . 469
Simple design procedures for unbraced multi-storey frames. F. W. Williams. TN 157 475
The investigation of sewer networks by computer. L. A. Cook and B. Lockwood. TN 161 481

Synopsis

A new modulus for mild steel. P. Vaidyan. Paper 7997 495

Discussions

Gates and shallow water waves. J. Ellis. Paper 7918 497
The TRRL hydrograph method of urban sewer design adapted for tropical conditions. L. H. Watkins. Paper 7934 501
Torsional performance of coupled channels in tall buildings. A. W. Irwin and N. Andrew. Paper 7967 509
General frame element for shear wall analysis. I. A. MacLeod. TN 143. . 513

September

Papers

Estimation of fluid loading on offshore structures. N. Hogben, B. L. Miller, J. W. Searle and G. Ward. Paper 8029 515
Design of deep beams with partially predefined reinforcement geometry. P. Kumar. Paper 7964 563
Torsion of tall building cores. A. W. Irwin and C. J. Bolton. Paper 8015 . 579
The buoyant wall jet. J. J. Sharp and B. D. Vyas. Paper 8020 . . . 593
Sympathetic changes in river regime. S. V. Chitale. Paper 8032 . . . 613
An appraisal of methods of testing some physical properties of sandcrete blocks. O. J. Uzomaka. Paper 8035 625
On the behaviour and the analysis of multi-storey infilled frames subject to lateral loading. T. C. Liauw and S. W. Lee. Paper 8052 641
Quality control—safety in precast concrete members. V. Solana. Paper 8021 657

Technical notes

Extended membrane analysis of cooling towers. E. Ingerslev. TN 155 . . 673
Comparison of a formal solution with experimental and finite element results for a box girder curved in plan. S. P. Sharma, B. K. Goyal and J. Ahmad. TN 163 681
Planning and rotational design of marine terminals for transportation of petroleum products. C. Ertuna. TN 164 685
An aerodynamic means of suppressing vortex excited oscillation. H. Y. Wong. TN 165 693
The frequency distribution of boundary shear and effect of non-uniformity on shear distribution in open channel flow resistance. S. N. Ghosh and L. K. Misra. TN 166 701

Discussions

Probabilisitic determination of design wind velocity in Germany. G. I. Schuëller and H. Panggabean. Paper 7954 711
A continuous method of analysis for the inflatable dam. R. D. Parbery. Paper 7955 713

Flow through quasi-rough circular pipes. A. Kumar. Paper 7956 . . 7
Rainfall, runoff and climatic change. A. S. Thom and D. C. Ledger. Paper 7960 7
Increasing sewer capacity by polymer dosing. R. H. J. Sellin. Paper 7971 . 7
A contribution to the design of composite beams to satisfy deflexion criteria. R. Taylor and J. Frodin. Paper 7973 7
Influence on strength of compression panels of stiffener section, spacing and weld connection. M. R. Horne, P. Montague and R. Narayanan. Paper 7975 . 7
Flood estimation for small East African rural catchments. D. Fiddes. Paper 7979 7
The elasto-plastic analysis of imperfect square plates under in-plane loading. J. E. Harding, R. E. Hobbs and B. G. Neal. Paper 7981 7
Non-linear finite element analysis of concrete slab structures. R. J. Cope and P. Vasudeva Rao. Paper 7988 7
Optimum design of composition box girder bridge structures. J. O. Surtees and D. Tordoff. Paper 8004 7
Hydraulic jumps in trapezoidal and triangular channels. K. H. M. Ali and A. Ridgway. TN 153 7

December

Papers

Optimum plastic design of space frames. M. M. K. Khalifa and J. E. Merwin. Paper 8026 7
A numerical integration method for computing the flutter speeds of suspension bridges in erection conditions. I. E. Iwegbue and D. M. Brotton. Paper 8042 7
Evaluation of a semi-confined Chalk aquifer in East Anglia. S. S. D. Foster and A. S. Robertson. Paper 8047 8
The generation of periodic waves in a laboratory channel: a comparison between theory and experiment. T. Keating and N. B. Webber. Paper 7985 . . 8
Stress analysis of submarine pipelines. T. K. Datta and A. K. Basu. Paper 8055 8
The method of bimoment distribution for the analysis of continuous thin-walled structures subject to torsion. A. H. Khan and H. Tottenham. Paper 8057 . 8
An inviscid model of vortex shedding from a circular cylinder in steady and oscillatory far flows. P. K. Stansby. Paper 8063 8
The bar simulation method for the calculation of shear lag in multi-cell and continuous box girders. A. R. Taherian and H. R. Evans. Paper 8065 . 8
Prestressed concrete T beams under combined bending and torsion. S. K. Roy and M. Mukhopadhyay. Paper 8066 8

Technical notes

Tests on the transverse bar shear connector for composite reinforced concrete. R. Taylor and P. Cunningham. TN 169 9
Optimization of design of circular tanks. C. A. Wilby. TN 170 . . . 9
Evaluation of storm water routeing models. N. A. Zaghloul. TN 173 . . 9
A quick screening method for estimating the routeing effect of a reservoir. J. S. Colombi and M. J. Hall. TN 175 9

Discussions

Buckling and vibration of thin, flat-walled structures continuous over several spans. Y. K. Cheung and C. Delcourt. Paper 7959 9
The prediction of the shear lag effect in box girders. H. A. Evans and A. R. Taherian. Paper 7978 9
Performance of storm drainage simulation models. P. J. Colyer. Paper 8011 . 9
The investigation of sewer networks by computer. L. A. Cook and B. Lockwood. TN 161 9

Corrigendum

Rainfall, runoff and climatic change. A. S. Thom and D. C. Ledger. Discussion on Paper 7960. 9

PRINTED IN GREAT BRITAIN BY WILLIAM CLOWES & SONS LIMITED, LONDON, BECCLES AND COLCHESTER
